

Free EEI Curriculum Training

Hosted by North Coast CREEC Network, Redwood Science Project, and the Humboldt State Natural History Museum

Come learn about the Education and the Environment Initiative (EEI), a free K-12 curriculum that teaches critical-skills in science and history-social science using environmental topics, such as water and energy, as a lens. Enjoy hands-on activities from EEI and other resources.

In this training, we will highlight:

- The EEI Curriculum history and the state's vision for environmental literacy.
- How the EEI Curriculum helps students build critical 21st century skills such as problem solving, communications and collaboration.
- The various features and components of a typical EEI unit: sample lessons, connections to California issues, and assessments.
- Common Core and Next Generation Science Standards support.
- How you can order your very own free EEI units.

Date: Wednesday, December 13, 2017

Time: 4:00 p.m. – 6:00 p.m.

Cost: Free!

Where: Humboldt State Natural History Museum

Address: 1242 G St., Arcata, CA

Registration: Please register by December 4, 2017. Space is limited. [Register by clicking here](#) or copy and paste:
